Election/Restriction

1. Applicant's election with traverse of Group I, claims 1-33 and 36-39 in Paper No. 8 is acknowledged.

A new restriction requirement is recast and set forth below.

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-17 and 36-39, drawn to a Drosophila potassium channel DmORF1, classified in Class 530, subclass 350.
- II. Claims 1-16, 18 and 36-39, drawn to a C. Elegans CeOrf1 potassium channel encoded by SEQ ID NO:3, classified in Class 530, subclass 350.
- III. Claims 1-16, 18 and 36-39, drawn to a C. Elegans CORK potassium channel of SEQ ID NO:63, classified in Class 530, subclass 350.
- IV. Claims 1-15, 19-21 and 36-39, drawn to a human hORk potassium channel of SEQ ID NO:45, classified in Class 530, subclass 350.
- V. Claims 1-15, 19-21 and 36-39, drawn to a human est potassium channel of SEQ ID NO:54, classified in Class 530, subclass 350.
- VI. Claims 22, 24, 27, 29-30 and 33, drawn to an isolated nucleotide sequence C. Elegans Cork of SEQ ID NO:36, an

Serial Number: 08/816,011 2
Art Unit: 1646

expression vector, a transformed yeast cell, and a kit, classified in Class 536, subclass 24.5.

VII. Claims 23, 25, 28-30, and 33, drawn to an isolated nucleotide sequence encoding HORK, an expression vector, a transformed yeast cell, and a kit, classified in Class 536, subclass 24.5.

VIII. Claims 24, 27, 29-30 and 33, drawn to an isolated nucleotide sequence encoding DmORF1, an expression vector, a transformed yeast cell, and a kit, classified in Class 536, subclass 24.5.

IX. Claims 26, 28, 29-30, and 33, drawn to an isolated nucleotide sequence of human SEQ ID NO:51, an expression vector, a transformed yeast cell, and a kit, classified in Class 536, subclass 24.5.

X. Claims 26, 28, 29-30, and 33, drawn to an isolated nucleotide sequence of mouse SEQ ID NO:52, an expression vector, a transformed yeast cell, and a kit, classified in Class 536, subclass 24.5.

XI. Claims 26, 28, 29-30, and 33, drawn to an isolated nucleotide sequence of mouse SEQ ID NO:53, an expression vector, a transformed yeast cell, and a kit, classified in Class 536, subclass 24.5.

XII. Claims 31-32, drawn to a method of assaying substances to determine effects on cell growth, Class 435, subclass 7.2.

Serial Number: 08/816,011

Art Unit: 1646

The inventions are distinct, each from the other because of the following reasons.

3

The products of Groups I-XI are distinct because the product of groups I-XI are structurally and functionally different from each other.

The products of Group I-XI, and the processes of invention XII, are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of Group III can be practiced with alternatively products of groups I-XI.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classifications and the search required for any one of inventions I-XII is not required for any other invention I-XII, thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims

Serial Number: 08/816,011 4

Art Unit: 1646

to a non-elected invention, the inventorship must be amended in compliance with 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Sequence Rules 37 CFR 1.821-1.825

3. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Figure 3 discloses an amino acid sequence which is not identified in the brief description of drawings. It is suggested that all sequences be labeled with the correct SEQ ID NO: next to the sequence in the specification or in the brief description of drawings.

Examiner requests a brief summary of the sequence listings. It is not clear where some of the sequences are fragments of a larger sequence and when the sequences are different sequence.

Serial Number: 08/816,011

Art Unit: 1646

Also on page 68 of the specification, SEQ ID NO: 55 and 62 appear to be the same sequence.

5

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pak, whose telephone number is (703) 305-7038. The examiner can normally be reached on Monday through Friday from 8:30 AM to 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler, can be reached on (703) 308-6564.

Official papers filed by fax should be directed to (703) 308-4242. Faxed draft or informal communications with the examiner should be directed to (703) 308-0294.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
